Gas Detection for Use with Aspirated Smoke Detection

Xtralis, the manufacturer of the market leading VESDA aspirating smoke detection (ASD) technology, has developed the industry's first multi-hole aspirated gas detector. When used with the compatible range of ASD products, VESDA ECO provides the industry's first combined aspirated smoke and gas detection system.

VESDA ECO provides early warning of toxic, oxygen, and flammable gas hazards to protect personnel and property whilst ensuring business continuity.

Applications include:
- Battery charging rooms
- Boiler plant rooms
- Commercial kitchens
- Parking garages
- Utility / service tunnels
- Refrigerated stores and plant rooms
- Water treatment and sewerage plants
- Power generation plants
- Metal processing plants
- and more.

How It Works

VESDA ECO uses an existing or new aspirating pipe network to actively monitor for gas escapes and build-ups. Each ECO gas detector can house up to two gas sensors, and additional detectors can be added easily to the pipe network to monitor more gases if required. Pre-calibrated sensor cartridges are easily replaced in the field and make converting to different gas sensors or replacing sensors a simple task.

The VESDA ECO detector is configured using Xtralis VSC configuration software and can be remotely monitored using Xtralis VSM4 monitoring software. Both VSC and VSM can be used to download data from the on-board memory card for data analysis and trending of historical data.

Integration with other building systems, including fire alarm control panels, PLCs, HVAC and building management systems, provides real-time situational awareness for intelligent emergency response.

VESDA ECO by Xtralis provides significant installation and routine maintenance cost savings over conventional multi-point gas detection solutions, by reducing the number of detectors required to cover an area and by providing easy access for routine maintenance.

Hazardous area certified variants of VESDA ECO are available. For more information on VESDA ECO Ex, refer to document 19826.
VESDA ECO Ordering information

VESDA ECO gas detectors come complete with the main housing, sensor cartridge, data storage card and USB interface cable. Two variants are available based on detector outputs:

**Part number structure: ECO-D-B-AA-BB**

### Single Gas Units

Replace AA with the relevant gas type number below and remove BB:

- 11 Hydrogen (H₂) 0-100% LFL
- 12 Methane (CH₄) 0-100% LFL
- 13 Propane (C₃H₈) 0-100% LFL
- 14 Hydrogen (H₂) 0-2000 ppm
- 15 Gasoline Vapour 0-100% LFL
- 16 Pentane (C₅H₁₂) 0-100% LFL
- 20 Alcohols 0-100% LFL
- 31 Oxygen depletion only (O₂) 0-25% v/v
- 32 Oxygen depletion and enrichment (O₂) 0-25% v/v
- 41 Carbon Monoxide (CO) 0-500 ppm
- 43 Hydrogen Sulphide (H₂S) 0-100 ppm
- 44 Sulphur Dioxide (SO₂) 0-10 ppm
- 45 Nitrogen Dioxide (NO₂) 0-10 ppm
- 49 Carbon Dioxide (CO₂) 0-5% v/v

### Dual Gas Units

Select one of the available combinations below. Replacing AA and BB with the preferred combination. Other combinations are available upon request:

- 12 – 31 Methane and Oxygen
- 12 – 41 Methane and Carbon Monoxide
- 12 – 43 Methane and Hydrogen Sulphide
- 13 – 31 Propane and Oxygen
- 31 – 41 Oxygen and Carbon Monoxide
- 41 – 43 Carbon Monoxide and Hydrogen Sulphide
- 41 – 45 Carbon Monoxide and Nitrogen Dioxide

**Example:** ECO-D-B-12-41

An ECO detector with relay, analog and serial outputs for Methane and Carbon Monoxide.

**Replacement sensor cartridge part number structure: ECO-SC-AA-BB**

Where SC = Sensor Cartridge, AA-BB are 1st and 2nd gas types (see above).

### Installation

VESDA ECO is designed to press fit on to air sampling pipe. To fit VESDA ECO simply remove a 60 mm section of pipe when using 25 mm OD air-sampling pipe work or 4\” for ½” BSP pipe. Use ECO-FT15 adapter when fitting ECO to 6mm based sampling systems.

VESDA ECO provides total flexibility to install one or more detectors anywhere on the pipe network to enable monitoring of a specific point, zone or total area.

**Specifications**

<table>
<thead>
<tr>
<th>Description</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supply Voltage</td>
<td>18-30 VDC</td>
</tr>
<tr>
<td>Power Consumption @ 24 VDC</td>
<td>3.6 W (max)</td>
</tr>
<tr>
<td>Current Consumption</td>
<td>Typically 60 mA @ 24 V DC for a dual gas (flammable / toxic) quiescent. 85 mA when in alarm.</td>
</tr>
<tr>
<td>Dimensions (WHD)</td>
<td>1.3” x 4.9” x 4.4” (34 mm x 125 mm x 110 mm)</td>
</tr>
<tr>
<td>Weight</td>
<td>0.6 pounds (250 g)</td>
</tr>
<tr>
<td>IP/NEMA ratings</td>
<td>IP65 and NEMA 4</td>
</tr>
<tr>
<td>Operating Conditions</td>
<td>Temperature typically -4°F to 122°F (-20°C to 50°C) gas dependant. O₂ -4°F to 131°F (-20°C to 55°C) N₂H₄ -4°F to 104°F (-20°C to 40°C) Humidity: 10-95% RH, non-condensing</td>
</tr>
<tr>
<td>Pipe Size</td>
<td>25 mm (EU), ¾&quot; (US/CAN)</td>
</tr>
<tr>
<td>Wire/Terminal size</td>
<td>1.5 mm² 16 AWG maximum</td>
