System Manager

Access NOTIFIER Systems

Directly from Your Mobile Device

In an age of mobile connectivity we expect to have eyes on our fire safety system anytime, from anywhere. Designed with functionality that helps you quickly access and track events, NOTIFIER System Manager provides that connectedness in an easy to use platform. You can conveniently configure your monitoring profile, set up monitoring status for each building, and quickly filter notifications by event type directly from the app. Compatible with NOTIFIER ONYX® panels, System Manager offers valuable benefits when paired with a web portal (or NFN gateway, BACNet gateway or NWS-3).

Get the most from System Manager:

The power of System Manager is furthered when connected with the eVance Inspection Manager and/or Service Manager platforms.

- › Inspection Manager allows test information to display for off-normal devices, giving you extensive data for comprehensive troubleshooting and diagnosis
- › Service Manager brings power to your End-User with simple and up to date service requests

Features and Benefits

Respond Faster to Events and Alarms

- › Push notifications of system events allow you to monitor one building or multiple site events “on the go”
- › Drill down to see a summary of events in each building
- › Identify the number of active alarms
- › Resolve simple issues quickly

Increase Productivity

- › Receive detailed device information and history to efficiently troubleshoot
- › Diagnose system issues from anywhere with data at your fingertips
- › Review device history, along with any open maintenance items
- › System details can be easily forwarded via text/email

SOFTWARE SOLUTIONS

Service and Inspection Software

Software that Improves Your Bottom Line

eVance™ Services is an industry leading software service that streamlines and improves test, inspection and service management operations for NOTIFIER distributors. Because your customers' buildings will have test and inspections done consistently and in accordance with appropriate codes and standards, Building Owners and Managers benefit from the improved professionalism, consistency, accuracy and timeliness of the test, inspection and maintenance services they receive.

The Inspection Manager Application provides documentation that all devices on a NOTIFIER fire system have been physically tested. The bar coding option enables any device or equipment within a facility to be integrated into eVance. Inspectors, building owners and managers as well as fire officials have immediate 24/7 electronic access to a building's test and inspection reports, compliance documentation and other historical data.

Service Manager

The Service Manager enhances distributor communications with centralized information management and real-time data sharing.

- › Notification of issues in real time to provide an immediate response and timely resolution
- › Provides building owners and managers with real time access to: service data and history, test and inspection reports, shared files, and system alerts
- › Improves service quality and increased first time fix rates
- › Enables more efficient dispatching with all the necessary information to schedule service calls along with job tracking, calendars, and report storage

Inspection Manager

The Inspection Manager dramatically improves the accuracy, efficiency and professionalism of test and inspection activities.

- › Automatically generates professionally formatted reports that comply with NFPA 72 or Joint Commission requirements.
- › Stores digital photographs of deficiencies that require corrective action within the applicable report or file.
- › Provides tools and resources to ensure buildings are compliant, tested consistently, correctly, and safe
