

NOTIFIER INSPIRE™: Efficient. Scalable. Connected.

Introducing the NOTIFIER INSPIRE series: a fully networkable life safety system designed to scale up with any installation, minimize the needs for equipment changes, and provide secure connectivity with industry compliance.

This **scalable single panel solution** is now **easier to install, simpler to use**, and can notably **enhance technician efficiency**.

NOTIFIER INSPIRE enables modular **expandability** to be ready at any time – a system that grows with a building.

The NOTIFIER INSPIRE series reduces the amount of equipment needed, which in turn impacts the amount of maintenance, replacements parts, and overall inventory management required.

The **Network Control Display (NCD)** on the NOTIFIER INSPIRE series has a **modern** and **intuitive** touchscreen user interface designed to minimize human error and meet today's building aesthetic needs.

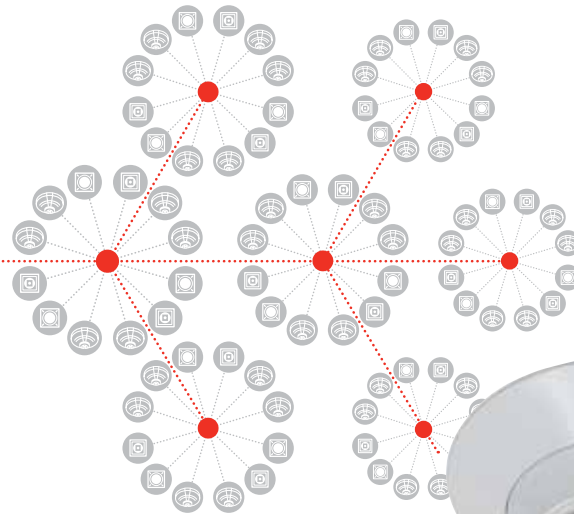

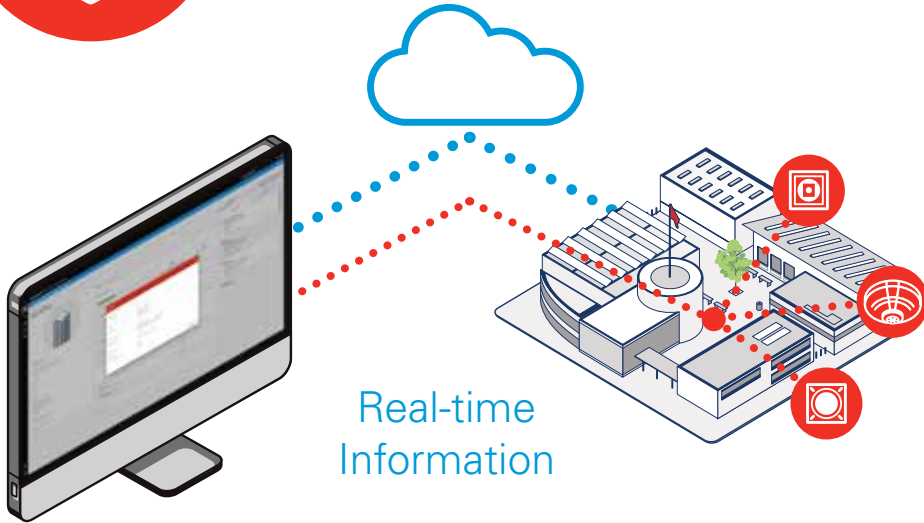

The **new annunciators** are more **versatile** than ever and can be programmed as LED indicators, action buttons OR a combination of both – all within the same product.

by Honeywell

NOTIFIER INSPIRE provides reliable protection and monitoring during the system lifecycle through the Honeywell Connected Life Safety Services (CLSS) platform.

The NOTIFIER INSPIRE Series – an all-in-one solution that delivers reliable protection, scalability, efficient monitoring and timely reporting with unmatched flexibility.

NOTIFIER INSPIRE: Efficient. Scalable. Connected.

Visit hwll.co/NOTIFIERConnectedSystems to learn more.

Connected Life Safety Services (CLSS) delivers real-time information to installers, service technicians and the end user.

With INSPIRE and CLSS, technicians can do the following tasks **remotely**:

- > **View** all of the buildings on a connected site
- > **Diagnose** and troubleshoot problems ahead of time, improving **first time fix** rate and reducing time spent on-site
- > **Download and share reports instantly once the job is done** – no manual transcription needed

What's more, the NOTIFIER INSPIRE series unlocks access to the world's first **self-testing photo and heat detectors** that automate the test and inspection process.

When utilized together, NOTIFIER INSPIRE, NOTIFIER Self-Test, and CLSS deliver a unique, game-changing solution that minimizes disruptions, maximizes what you can do remotely, and ensures compliance.

This solution is available exclusively through NOTIFIER.
